

Scholarly Books in the Humanities and Social Sciences

Project MUSE, a not-for-profit collaboration between publishers and libraries, is a trusted provider of authoritative humanities and social science content for the scholarly community. The MUSE platform brings together nearly 90,000 scholarly books from more than 200 distinguished university presses and related publishers, fully integrated for search and discovery with MUSE's hundreds of respected scholarly journals.

All books are DRM-free with unlimited simultaneous use, downloading, and printing, making them ideal for research and instruction. Several thousand books are fully Open Access, freely available to any user worldwide.

Project MUSE Book Products

Project MUSE provides access to thousands of books across a large range of subjects within the humanities and social sciences. A wide variety of acquisition options makes it easy to build digital scholarly book collections to meet your institution's needs and budget. Participating publishers select the titles they offer on the MUSE platform, and decide through which product models they will make their books available.

MUSE offers tiered pricing on our Annual Frontlist Book Collections, providing value for all sizes and types of libraries. The Books Custom Collection option allows a library to build and buy a set of books tailored to its specific needs and available funds, with discounts for larger collections. Highly flexible Evidence-Based Acquisition and Single Title Purchasing options allow for selection of the books most in demand by researchers and faculty.

Request pricing and more information on MUSE book products for your library: about.muse.jhu.edu/about/quote

Annual Frontlist Collections

Each year, Project MUSE offers a selection of frontlist collections for advance purchase, providing access to the newest titles from our participating publishers. These collections are typically available for pre-purchase by October of the year preceding the calendar year in which the books are published, and access to included titles is provided as soon as the newly-published books are live on the MUSE platform. Annual Frontlist Collections remain available for the duration of the calendar year during which the new books are being released, with midyear purchasers immediately gaining access to all books already on the platform in the selected collection. Purchase of a MUSE Annual Frontlist Collection conveys perpetual access rights and interlibrary loan permission for the included books.

Annual Frontlist Collections are available for a wide variety of humanities and social science subjects, and also by area studies. A Complete Collection is also available, including every newly-released collection book on the platform for the year. (Note that publishers may designate some titles be excluded from collection sales.) Each book is assigned to only one subject collection and one area studies collection, so libraries may purchase more than one collection without concern for overlap.

AFRICAN STUDIES	HISTORY	POLITICAL SCIENCE AND POLICY STUDIES
AMERICAN STUDIES	JEWISH STUDIES	PSYCHOLOGY
ARCHAEOLOGY AND ANTHROPOLOGY	LANGUAGE AND LINGUISTICS	PUBLIC HEALTH AND HEALTH POLICY
ART AND ARCHITECTURE	LATIN AMERICAN AND CARIBBEAN STUDIES	SCIENCE, TECHNOLOGY AND MEDIA

A small number of specially-themed book sets are also available as collections on MUSE.

THE BOOKER T. WASHINGTON PAPERS
DIETRICH BONHOEFFER WORKS

HERMENEIA: A Critical and Historical Commentary on the Bible
KARL MARX AND FREDERICK ENGELS: Collected Works

Books Custom Collections

Project MUSE Books Custom Collections offer a flexible and cost-effective way to acquire books on the MUSE platform. A Custom Collection provides a library with ultimate choice to create a selection that meets both their needs and their budget. All books for sale on the platform may be included in a custom collection. Design a collection the easy way by filtering our thousands of titles by subject, publisher, publication date, or price - or more closely curate a collection by making individual title selections. Easily add electronic access for existing print holdings, instantly gain resources to support a new program/major, or quickly address course needs with a collection tailored to instructor requests.

Discounts are available for selected custom collections. (Note that publishers may designate some titles as not eligible for discounting. These may be included in a custom collection at full price.) Purchase of a MUSE Books Custom Collection conveys perpetual access rights and interlibrary loan permission for the included books.

Evidence-Based Acquisition

Evidence-Based Acquisition (EBA) of Books on Project MUSE provides libraries with an option to open up discovery and access for thousands of high-quality scholarly books, allowing faculty and students to find and make use of the most relevant content for their research and teaching. The user experience is as if your institution already owns the book, with unlimited simultaneous usage, downloading and printing of DRM-free PDF chapters. Monthly reports allow you to track the books receiving use, and select for permanent acquisition those titles best suited for your collection. The access available via an EBA program also allows library subject selectors to more thoroughly review titles recommended by faculty or approval profiles before making purchase decisions.

EBA programs may be tailored to meet specific collection development needs and budgets, through limiting the access pool by subject, publication year, publisher, or price. All books made available by the publisher for individual sale on the MUSE platform may also be included in EBA.

Contact muse_sales@jhu.edu to talk about initiating EBA with MUSE.

Single Title Book Purchasing

Most books on the MUSE platform are also offered individually for institutional perpetual access purchase. MUSE works with third parties to facilitate the purchasing of individual book titles, allowing libraries to acquire electronic books on MUSE through familiar, established channels. Publishers opt-in to participate in the single title sales program, select the books that will be available, and set prices for single title purchasing.

Single title purchasing is currently available through GOBI Library Solutions from EBSCO, and via the OASIS and RIALTO platforms from ProQuest. Specific title availability information and pricing is accessible through these partners. Libraries are encouraged to contact their preferred vendor for more information on incorporating MUSE books in eApproval plans, receiving title notifications, and how to order individual titles.

MUSE also offers direct single title purchasing on our platform. Contact muse_sales@jhu.edu to inquire about direct purchase of an individual book for your library.

Open Access Books on MUSE

Project MUSE hosts a growing collection of several thousand fully open access (OA) books, offering distinguished scholarly publishers a platform for their OA titles which ensures visibility, discoverability, and wide dissemination. A significant proportion of OA books on MUSE are offered in an adaptable HTML5 format, while the remainder appear as chapter-level PDFs, all with unlimited downloading and printing.

Books are made OA on MUSE through a wide variety of funding initiatives. The publishers of the books determine the licensing terms under which the titles are made available.

OA books on MUSE are freely available to libraries and users around the world. The OA book content may be discovered using the standard platform tools and will appear in searches alongside chapters and articles from an institution's subscribed or purchased materials. Free MARC records are offered and metadata for the books is shared with a wide variety of industry partners.

Participating Publishers

Project MUSE collaborates with hundreds of mission-driven publishers to curate our collection of essential books in the humanities and social sciences. Enhancing the discoverability of high-quality scholarship is crucial to growing our collective knowledge. Our business model sustains our publishers while keeping our collections affordable for libraries. Our participating publishers include university presses of all sizes from around the globe, scholarly societies, academic departments, scholar-led presses, and related not-for-profit publishing entities. Publishers may have gated titles, open access titles, or a mixture of both, on the MUSE platform.
